We are right in the midst of a revival, a Great Revival.

Hard Rock is always prevailing. Bands, that play the classic Hard Rock and its variations or that are geared to it, are currently riding on a wave of success. After the 90es that were heavily influenced by Grunge, Crossover and Alternative, the new Millennium brought us a great comeback of the classic Hard Rock and Heavy Metal. Rock catchy drum grooves, a powerful and heavy bass in synergy with blues oriented guitars and vocals that offer melodic runs and the typical "rock pipe" with a "screaming-for-vengeance-attitude" - this is the trademark of Great Revival. Inspired by the Crème de la crème of Hard Rock and Heavy Metal: Iron Maiden, AC/DC and Judas Priest along with melodic rock stimulus from bands like Mr.Big and Billy Idol - the German - Russian project Great Revival has managed to find their very own rock identity. The sound is defiant, restless and wild, which shows their frankness. The production sounds raw, earthy and non-palliated. Great Revival substantiates their message with a wittingly non sterile production. Real, pure rock, that will be appreciated by all fans of classic Hard Rock and Heavy Metal.

With their Debut Album "Wild" Great Revival carves out their own place within the Hard Rock of the 21st century.
